

# HISi INVENTORIES SPECIALISTS, INC.

3615 W. Waters Ave. • Tampa, FL 33614

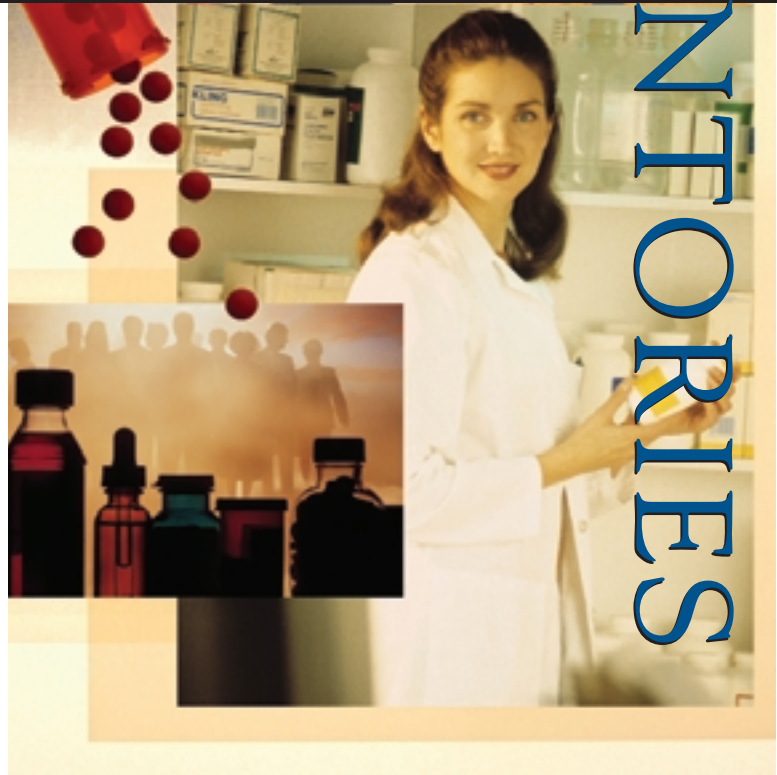

*The Leader in Inventory Services*

**NATIONWIDE**  
*You Can Count on Us!*

Hospital Inventories Specialists, Inc. is an established, independent source for *reliable inventory services & data compilation*. Over the past twenty-five years this focus has enabled our company to experience steady growth. Our tradition of excellence and attention to detail continues as we draw upon our proven experience to help our healthcare clients meet the challenges of an evolving industry. HISI understands that achieving cost savings, efficiency and inventory control are more important than ever. Our organization provides superb customer service as well as a process and results that are cost effective. Selecting a full service inventory company is made easy.

When you choose HISI you receive customized inventory services. Our professional personnel *utilize a variety of methods to efficiently and accurately record the inventory with minimal interference to normal business*. Your physical inventory may be accomplished by the use of bar scans, audio recorders, client count sheets or hand held units. After collecting the physical inventory information an itemized, priced and extended report is generated. The majority of the valuation process is done using the *client's acquisition prices*. However, if the hospital does not have a record of price paid for an item that was found in stock, HISI can utilize its database of manufacturer prices. The customer's final reports are flagged to indicate the valuation sources. In addition to a certification and standard set of hard copy data sorts the inventory is *available electronically* on diskette, cd or via e-mail. HISI provides accurate financial data that allows our clients to analyze their inventories in detail and target areas of special interest.

Healthcare
